DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding claim 1, it is unclear what is intended with the phase "cards." For the purpose of examination, "IC cards" will be assumed.

Regarding claim 3, it is unclear what is intended with the phase "sticking a laminate sheet member onto adhesive layer surface exposed as a result of the stripping of the release sheet." For the purpose of examination, "sticking the mount substrate with the adhesive layer surface exposed as a result of the stripping of the release sheet onto an article" will be assumed.

Regarding claim 3, it is unclear how the hardened adhesive can be used to stick the mount onto an article.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 1734

5. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Tsuda et al (JP 11,221,986).

Tsuda et al discloses a process for forming an IC card. The process includes feeding a resin sheet with an IC chip and an antenna and a pair of sheet substrates on both side of the resin sheet, inserting an adhesive between the sheet substrates, and pressing the substrates to regulate the distance between the pair of sheet substrates and allow the adhesive to cure. (Translation, Page 8, line 1 to Page 10, line 10 and Figure 2)

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuda et al (JP 11,221,986) in view of Appalucci et al (U.S. 5,841,350).

Tsuda et al as noted above does not disclose one of the sheet substrate is a release sheet and stripping of the release sheet from the IC card allows the card to be mounted on any article. Appalucci et al discloses an IC card, i.e. a resonant tag circuit, with an adhesive layer on one side and cover by a release sheet to allow the IC card be mounted on any article or article's packaging by removing the release sheet. (Col 14, lines 28-39)

Art Unit: 1734

It would have been obvious to one skilled in the art at the time the invention was made to provide a release sheet as disclosed by Appalucci et al as one of the sheet substrate in the process of Tsuda et al to allow easy mounting of the IC card to any article for tracking purpose.
